Reference number 362/203

362/204

13. An illuminated arrow nock, as set forth in claim 11, whereas said nock having a hole bored to accept said anchor pin thereby combining nock and battery in a permanently fixed position within said nock.

14. An illuminated arrow nock, as set forth in claim 11, whereby a plastic end cap is bored the same diameter as the outside diameter of the battery thereby allowing end cap to be installed over battery and positioned at the rearward most portion of said battery to further align and cushion battery and nock assembly.
